[Core Techs] → 100 %

1. C programming - Logics & Memory management
2. python -
3. JavaScript + Typescript -
4. HTML & CSS -
5. React.JS -
6. Node.JS + Express.JS -
7. MongoDB -
8. Git & GitHub -
9. Java

[Supporting Techs] → (30 - 40) %

10. Linux & Terminal Commands - filesystem & navigation, permissions
11. cloud (AWS/Azure/Google cloud)
12. Docker
13. APIs & Json
14. Data Structures & Algorithms (DSA)
15. cybersecurity Basics
16. AI & Machine Learning
17. Data Science/AI - Deep Learning, NLP, CNN, RN Bigdata, MLOPS, Computer vision, GANs
18. Blockchain -
19. IoT - Sensors, Arduino, Respberry Pi

Firewalls, Encryption, HTTP/HTTPS, DNS, Proxy

20. Cybersecurity - Ethical hacking, OWASP penetration testing

21. AR/VR -

22. Quantum Computing - Qubits, quantum gates, IBM Qiskit basics

23. CI/CD -

24. Robotics -

- Metaverse Development
- Bioinformatics / Nanotech AI
- Design & UI → Figma, Canva, Adobe XD
- Project Management - Jira, Trello, Notion, Asana
- APIs & Integration - Rest, GraphQL, WebSockets
- Automation - Selenium, Beautiful Soup, Scrapy, Auth0
- Analytics - Google Analytics, Mixpanel, Amplitude
- LLM & Chatbots - openAI API, LangChain, Pinecone, RAG systems
- Voice AI - whisper, ElevenLabs, Coqui AI
- Image AI - stability AI, Midjourney API, openAI DALL-E

- Video AI - RunwayML, Synthesia, Pika Labs
- AI Agents - AutoGPT, CrewAI, AgentGPT
- Code Hosting - GitHub, GitLab
- Deployment - Vercel, Render, Railway, AWS
- ~~Learning~~
